

# DECENT<sup>TM</sup>

GROUP

[www.decentstone.com](http://www.decentstone.com)

Manufacturer & Exporter of  
Cubic Zirconia & Synthetic Stones

# COMPANY PROFILE

The foundation of the Decent Group was laid more than twenty years ago in 1992 to conduct business in all kinds of Cubic Zirconia and Synthetic Stones products with integrity and full ethics, always placing the customer needs and full satisfaction as a first priority.

We establish professionally our manufacturing base in China with our own cutting factory to cut all kinds of Cubic Zirconia and Synthetic Stones in various colors. We employed more than 250 workers to start our mass production; all the products are passing through highly qualified Quality control (QC) department which always committed to maintain the higher standard of quality.

Under the leadership of our core management team, Decent Group has grown to become a global corporation with fully integrated operation in all kinds of Machine cut Cubic Zirconia and Synthetic Stones, Our factory has modern machinery and European technology to cut finest quality of stones

From procurement to manufacturing and till marketing Decent Group is involve in entire chain of the industry with sales offices spread across all major Asian countries like Thailand, Hongkong, India and China.

## Decent group- Vision

We Decent Group are always committed to serve our customer needs with full integrity, dedication and ethics, All our efforts are towards satisfying our global customers need and to assure them that they will be fully satisfy with our quality products and prices by incorporating professional management systems.

**"The Watchwords for us are Teamwork, Learning, Innovation and Professionalism".**

## Office & Factory

Thailand Office (Jewelry Trade center building)

Hong Kong Office(Hilder Centre)

Bangkok Gem and Jewelry Show (Booth)

## European Machine Cut Cubic Zirconia

### SWISS STAR®

In the year 2008 we introduce our trade mark product Swiss Star® to the industry, which is a top quality Swiss machine cut round stone that shows a star effect in it.

It is produced by fully automated European Machinery, and all of the stones are tested to high quality standards for brilliance, perfection of cutting, and sharp dispersion of light and fire. Apart from round shape Swiss star products can also produce in different shapes like Oval, Pear, Square, Marquise, Heart and many Fancy Shapes.

Our Swiss Star® products are now highly successful and recognize product in global market

#### Specification

- Swiss machine cut
- Heart and Arrow cut 100% (Star Cut)
- Suitable for Wax Casting
- Size available from 0.70mm To 15.00mm
- American Rough material
- Size tolerance of +/- 0.010mm only

## Korean Machine Cut Cubic Zirconia

We are also capable to produce two more grades in machine cut cubic zirconia name as KOREAN STAR and SUPER FINE, both qualities are produce by fully automatic Korean Machines with full Heart and Arrow effects in each stones.

### Korean Star

- Korean Machine Cut (CNC)
- Heart and Arrow cut (Star Cut)
- Suitable for Wax Casting
- Size available from 0.70mm to 12.00mm
- \*57 facets star cut

### Super Fine

- Korean Machine Cut
- Heart and Arrow cut (Star Cut)
- Suitable for Wax Casting
- Size available from 0.80mm to 10.00mm
- \*49 facets star cut

## Cubic Zirconia

Is Crystalline form of Zirconium dioxide (ZRO2). The synthesized material is hard, optically flawless and usually colorless. It is a dense substance, with specific gravity between 5.6 and 6.0 — at least 1.6 times that of diamond. Cubic Zirconia is relatively hard, 8–8.5 on the Mohs scale with extremely high melting point of 2750 C.

We are capable to produce it in more than 40 Colors from normal to all Special Fancy Colors in all shapes and sizes.

### Normal Color Cubic Zirconia

### Special Color Cubic Zirconia

## Synthetic Corundum

The name CORUNDUM is derived from Tamil word KURUNTUM meaning ruby, Corundum is crystalline form of aluminum oxide (Al<sub>2</sub>O<sub>3</sub>), Synthetic Corundum is best substitute for Natural Ruby and Blue Sapphires,

Synthetic Corundum hardness is 8.5 -9.0 in mohs scale, with high melting point of 2050 C, it is fully suitable for wax casting process.

### Synthetic Spinel

Synthetic Spinal material is transparent to opaque with dull luster. Spinal comes in variety of colors like aquamarine, Sapphire Blue and Green in different shades from light, medium, dark. Its hardness is 8, specific gravity is 3.5 to 4.1 and heat resistance is up to 1100 C

## Nano Gemstone

### Created Emerald

Lab-Created or Synthetic Emeralds are the best substitute of Natural Emeralds, their chemical composition is the same as Natural Emeralds, they are mostly flawless and not expensive like Natural Emeralds, and our factory can produce it in all shapes and sizes like Round, Oval, Pear, Octogen, Cushion, Hearts and all other shapes as per customer orders.

### Hydro Thermal Quartz

Hydro Thermal Quartz are synthetic quartz, they are best substitute of natural semi precious stones like Citrine, Amethyst, Garnet, Ametrin, Lemon Quartz, blue topaz. It is a man made stone with melting point 1670 c, as it is inexpensive and flawless it's very popular now in recent silver jewelry productions.

NANO GEMSTONE – is a ceramic material with very tiny-size Spinal phases. It has special physical and optical properties: Color- homogeneous and even, Hardness = 7 – 7.5, Refractive Index = 1.61 – 1.64, Density = 3.0 – 3.3 g/cm<sup>3</sup>, Melting Temperature 1600-1750°C, Luster and Color are maximally close to many natural gemstones. High thermal shock resistance makes Nanogem fully compatible with wax casting jewelry.

Nanogem is the best substitute of the color natural gemstones! It completely simulate the brightness, colors, hardness and density of many gemstones: Green Emerald, Blue Sapphire, Blue Topaz, Aquamarine, Citrine, Peridot, Garnet, Kunzite, Morganite, Smoky Quartz, Turquoise and many others natural gem stones.

## Glass Stones

Glass Stones are a non-crystalline solid material which is often transparent and has widespread practical, technological, and decorative usage. Glass is both reflective and refractive of light, and these qualities can be enhanced by cutting and polishing them in different shapes and cuts. Glass Stones are the cheapest stones when comparing with any other synthetic stones available. They are transparent, flawless, lighter weight compare to any other synthetic stones.

We, Decent Group can cut more than 250 colors of Glass Stones in any shapes and sizes at our factory, which gives a immense number of choices to jewelry production industries.

## Cutting & Shape

 ROUND	 CUSHION	 OVAL	 PEAR	 OCTAGON	 BAGUETTE
 HEART	 MARQUISE	 TRILLION	 STAR	 TAPERED	 SQUARE
 HEXAGON	 PENTAGON	 EMERALD	 CHECKERED CROWN	 DOUBLE CROWN	 CUBOID CUT
 STEP CUT BEAD	 RONDELLE	 FULL ROSE CUT	 STAR CUT	 SCREW CUT	 ZICK ZACK CUT
 FREE FORM	 TWISTED	 STEP CUT BRIOLETTE	 BRILLIANT CUT BRIOLETTE	 PROFILE CUT	 STEPPED CROWN
